

## Enviroflex™ 2000

Enviroflex™ 2000 is a high integrity, composite gasket design that has proven itself with over 20 years of field service.

### FEATURES AND BENEFITS:

- **A GASKET DESIGN THAT EXCEEDS ALL CURRENT ENVIRONMENTAL, SAFETY AND PROCESS STANDARDS**
- **ABSOLUTE SEAL INTEGRITY; FIRE SAFE; EASY TO USE**

### SPECIFICATIONS

**Temperature** -450° F to 5,500° F

*Temperature limitations are restricted by the type of metal carrier.*

**Pressure** Vacuum to 20,200 psi  
(2,857 bar)

*Pressure is limited only by hydraulic forces.*

#### Composition

*Pressure is limited only by hydraulic forces.*

#### Performance Data

*Results from emerging performance tests developed by PVRC and MTI demonstrate the Enviroflex 2000's outstanding reliability. Test protocol included ROTT, HATR, HOTT, AHOT and FITT procedures and were conducted at the gasket testing facility of the Ecole Polytechnique of the University of Montreal.*

#### Summation

*From petroleum refiners to aerospace component manufacturers, Enviroflex 2000 is the one gasket that meets the demanding requirements of industry today and tomorrow.*
