

## Detergent Lubricating Fluid

High quality all-purpose light grade lubricant penetrates close tolerances, leaving a load carrying lubricating film. An all-purpose light duty lubricant for all types of equipment, electric motors and machinery, as well as sensitive instruments such as chronometers, electronic motors, amplifiers, tape recorders, etc. Used in machine shops, boiler rooms, instrument repair shops, maintenance shops and assembly lines. Ordinary lubricating oils are not detergent; do not creep and spread; work only in ideal conditions but LMS 100 Detergent Lube is different: its super-active formula keeps moving until it finds hidden friction spots. It is a high quality, premium, all purpose, light grade, detergent, lubricating oil. Its unique formulation and effective lubrication ability provides a very tough and efficient lubricating film for all kinds of moving machinery, electric motors, sensitive instruments, door hinges, rollers and other devices which require a light grade of lubrication. Detergent Lube contains a special detergent additive that seeks to keep the lubricated area clean. This is accomplished by keeping any dirt particles from settling or adhering to the surface of the lubricated parts. Anti-oxidant lengthens life; reduces sludge, will not gum-up delicate machines. Long lasting, non-drying film reduces friction. Reduces energy requirements. Air and moisture excluding film inhibits corrosion of metal surfaces.

### **Features:**

- Penetrates
- Lubricates
- Premium Light Grade Oil
- Contains Anti-Oxidants
- Contains Detergents

### **Directions for Use:**

Apply by spray or using a squirt oiler or oil can with extended spout. Apply evenly. Allow a minute for deep penetration. Reapply as needed. Use in existing lubrication system.

### **Applications:**

An efficient light grade lubricant for plant wide use on machinery, equipment or delicate instruments.

### **Safety Engineering Guide:**

Petroleum Base Lubricant-Flashpoint 329 F(165 C)-TLV 50

### **Precautionary Information:**

As with any similar product, if swallowed in large quantities this product could be harmful or fatal. Prolonged skin contact and excessive inhalation of the spray mist should be avoided.

Available in a case of (12) 16oz cans.
